

## **Lake Eufaula Advisory Committee Goals**

The Southwestern Power Resources Association (SPRA) is honored to be a part of the Lake Eufaula Advisory Committee (LEAC). With our participation in the LEAC, we hope to continue and further the valuable relationships we have made with the Southwestern Power Administration, the Corps, and other valued stakeholders. SPRA proudly supports all of the efforts of the Southwestern Power Administration (SWPA) in managing the entire federal hydropower system in a collaborative manner. In doing so, SWPA has been able to navigate a historic drought while maintaining water levels to the best of its ability in not only Lake Eufaula, but 23 of the other projects it manages. With this continued effort, SPRA believes the focus of the LEAC should be on furthering the practices already in place at Lake Eufaula.

*Please contact my office with any questions regarding federal hydropower:*
